

Everything You Always Wanted to Know About Anesthesia.... But Were Too Busy to Ask

Whether you're a nursing novice or veteran, here's the seminar which will answer all the questions you've never had time to ask about why anesthesia providers do what they do....and perhaps even why you do what you do with surgical patients!

This intensive overview of anesthesia techniques, pharmacology, and complications will be specifically related to nursing actions along the anesthesia continuum from pre-anesthesia assessment through the operating room and PACU to discharge to ward or home.

Using real case histories from her extensive clinical experience, Deborah will sharpen your understanding of the factors and choices at work in anesthesia decision-making. Your increased knowledge will increase patient safety, bolster your professional self-confidence, and improve teamwork.

Seminar topics include:

- General Anesthesia
 - inhalational agents
 - neuromuscular blockade
 - narcotics
 - adjunctive agents
- Regional Anesthesia
 - spinal anesthesia
 - epidural anesthesia
 - peripheral blocks
- Local Anesthesia
- Sedation and Analgesia
- Monitoring
- Selected Anesthesia Complications
 - "the lost airway "
 - malignant hyperthermia
- Preanesthesia Assessment
- Post-anesthesia Assessment
- Discharge Criteria

Bring your questions and interesting cases for discussion!
