

Legal Aspects of PeriAnesthesia Nursing

For all nurses who care for patients receiving anesthesia: your practice places unique demands and responsibilities on you. High patient turnover and intensive patient-care demands can put you at risk for legal action.

- Do you ever worry about a nursing malpractice lawsuit?
- Do you wonder how your care and documentation will stand up if placed under the legal microscope?
- Do you know the most common areas of alleged nursing negligence?
- Do you know the pitfalls of "defensive documentation?"

Join us for an intensive, fast-paced day of updated information about legal aspects of perianesthesia nursing care, including:

- Reviewing legal aspects of nursing care. You will hear about real perianesthesia cases from the literature as well as the instructor's experience as a legal nurse consultant and legal nurse consultant.
- Strengthening practice areas which might be viewed as weak in the legal system. You will receive practice advice related to perianesthesia care from an active clinician.
- Improving personal and professional confidence in daily practice with effective risk management strategies. Risk management does not "belong" just to administration...every nurse needs to develop strategies to protect individual practice.

Deborah is an active member of The American Association of Legal Nurse Consultants. During the past decade, she has consulted and testified in both plaintiff and defense cases. She has written two medical-legal chapters, and she has served as a guest editor for Nursing Clinics of North America. She has also served as an Associate Editor of both editions of Legal Nurse Consulting Principles and Practice, published by the American Association of Legal Nurse Consultants.

Bonus!

How to Get Started in Legal Nurse Consulting

At the end of the seminar day, Deborah will present an optional non-credit hour for interested participants about the challenges of this branch of professional nursing. This is a casual nuts-and-bolts discussion with plenty of time for your questions.
